

Giraffes

**Why do giraffes
have such a
long neck?**

How long is a giraffe's neck?

A close-up photograph of a giraffe's head and neck, tilted upwards. The giraffe has brown and white spotted fur. Its long, dark tongue is extended, reaching up to grasp green leaves from a tree branch. The background is a clear blue sky with some light clouds. The text "How long is a giraffe's tongue?" is overlaid at the top in white with a drop shadow.

patterned fur?**

How tall is an adult giraffe?

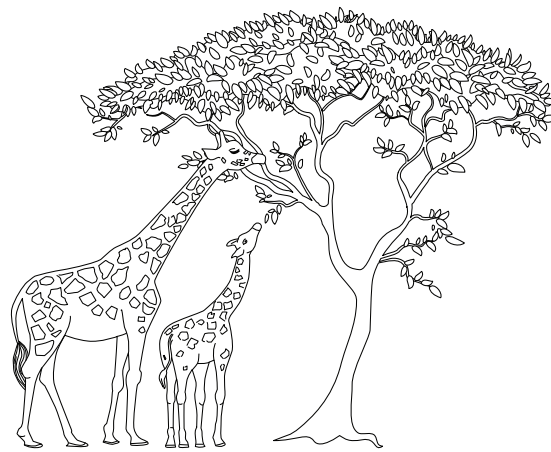

(1.8 m is 6 ft)

Why are giraffes so tall?

Name:

Giraffes

Giraffes are the tallest land animal in the world.

Giraffes eat plants. Their long legs and long neck helps them reach the leaves of tall trees.

Write some more facts about giraffes.

Handwriting practice lines consisting of multiple sets of solid top and bottom lines with a dashed midline.
