

Name: _____

Mixed Tables

$6 \times 6 = \underline{\quad}$ $7 \times 2 = \underline{\quad}$

$4 \times 3 = \underline{\quad}$ $0 \times 0 = \underline{\quad}$

$3 \times 8 = \underline{\quad}$ $10 \times 4 = \underline{\quad}$

$6 \times 4 = \underline{\quad}$ $5 \times 1 = \underline{\quad}$

$8 \times 8 = \underline{\quad}$ $9 \times 8 = \underline{\quad}$

$2 \times 0 = \underline{\quad}$ $0 \times 4 = \underline{\quad}$

$4 \times 2 = \underline{\quad}$ $9 \times 10 = \underline{\quad}$

$9 \times 9 = \underline{\quad}$ $8 \times 4 = \underline{\quad}$

$7 \times 8 = \underline{\quad}$ $6 \times 8 = \underline{\quad}$

$7 \times 1 = \underline{\quad}$ $0 \times 2 = \underline{\quad}$

$8 \times 6 = \underline{\quad}$ $8 \times 5 = \underline{\quad}$

$5 \times 3 = \underline{\quad}$ $5 \times 5 = \underline{\quad}$

$9 \times 1 = \underline{\quad}$ $7 \times 6 = \underline{\quad}$

$2 \times 4 = \underline{\quad}$ $4 \times 8 = \underline{\quad}$

$3 \times 5 = \underline{\quad}$ $9 \times 9 = \underline{\quad}$

$6 \times 3 = \underline{\quad}$ $1 \times 5 = \underline{\quad}$

$4 \times 5 = \underline{\quad}$ $2 \times 5 = \underline{\quad}$

Working Mathematically

- 1) Jars of peanut butter are delivered in packs of six.

How many jars in 7 packs? _____

- 2) Each box contains 8 cameras.

How many cameras in 8 boxes? _____

- 3) Mrs Pots needs 5 sweets for each of her 10 students.

How many sweets does she need to buy? _____

4)

There are 6 eggs in a pack.

How many eggs in 9 packs? _____

- 5) Six tents can sleep four children each.

Three tents can sleep two children each.

How many children are able to stay at the campsite?
