

POLAR BEARS

Name:

Date:

How have polar bears adapted to the climatic conditions in the Arctic ?

Explain how the polar bear's features help them survive in the Arctic's cold climate.

Fur:

Fat:

Skin:

A polar bear's body retains as much heat as it can to help it cope with the cold conditions. Polar bears don't lose heat through their skin, like we do.

Explain how rising temperatures in the Arctic, due to climate change, may affect polar bears.
