

# Mountainous Landforms

A scenic view of a mountain range. The foreground is filled with dark, silhouetted evergreen trees. The middle ground shows rolling hills and mountains covered in dense green forests. The background features several layers of mountains, with the furthest ones appearing hazy and misty, creating a sense of depth. The overall lighting is soft and warm, suggesting a sunrise or sunset.

# Mountainous Landforms

Mountain, range, peak, ridge, crevice, valley, glacier.

A glacier is a frozen river. Glaciers move very slowly.

V-shaped valleys are carved by rivers.

U-shaped valleys are carved by glaciers.

How do you think the Himalayan Mountain Range formed?

Study*ladder*

Mountain ranges occur all around the world. Many mountains running in a line are referred to as a mountain range. The world's highest mountain range is the Himalayas, located between India and China.
