

Team-Building Tasks

Group Designer Activity 6

Materials:

- * newspaper
- * sticky tape
- * paper towel roll
- * marble

This activity is designed for teams of 3 people.

Group members work cooperatively to build a 'pipeline' that allows a marble to travel, without hands touching it, a distance of one metre.

The construction should be free standing and able to support the movement of the marble without breaking.

The pipeline designs that transport the marble more than one metre without dropping to the ground pass the test!
