

Measuring Mass

Equipment: Kitchen scales

Find five items.

Estimate then measure the weight of each item using kitchen scales.

Record your results in the table below.

In the last column record how many of that item are needed to weigh a total about 1 kilogram.

Remember that there are 1000 grams in 1 kilogram.

Item	Estimate Mass	Measure Mass	Equal about 1 kg
an orange	165 g	195 g	4

What's the Mass?

Find five grocery items in the pantry.

Estimate the mass of each item then read the label to check your estimate.

How close were your estimates?
