

**The Water Cycle:**

Draw a diagram that describes how water changes states in the environment, from liquid to solid and liquid to gas.

List examples of water in a solid form in the environment.

---

---

---

Where does water occur naturally on earth in a liquid state.

---

---

---

Where does water go when it becomes a vapour?

---

---

---

What happens to water vapour when it cools?

---

---

---

Name some different types of precipitation.

---

---

---

What word means to change from a gas to a liquid?

---

---

---

What word means to change from a liquid to a gas?
