Subtracting single digit numbers

Question 1

There 9 cows are in a paddock. If 6 walk away, how many cows are left in the paddock?

Question 2

Liam has 7 chips. After eating 3, how many chips does Liam have left?

Question 3

8 cakes were served at a party. If 6 cakes were eaten, how many cakes are left?

Question 4

There are 8 balls in a bag. If 1 ball is taken out, how many balls left in the bag?

Question 5

Six people started a race. One person didn't finish. How many people finished the race?

Question 6

There are 6 birds in a tree. If they all fly away, how many birds are left in the tree?

Question 7

Sarah has 9 strawberries. After eating 2, how many strawberries does she have left?

Question 8

There are nine buses at the depot. Three buses drive away. How many buses were left at the depot?

Question 9

Jack has 9 coins. After spending 5 coins, how many coins does Jack have left?

Question 10

There are eight items on a shelf. Three are taken away. How many items left on the shelf?

Subtracting single digit numbers solutions

<p>Question 1 9 cows are in a paddock. If 6 walk away, how many cows are left in the paddock?</p>	<p>Solution To calculate how many cows are left in the paddock, subtract the number of cows that walk away from the number of cows originally in the paddock.</p> $9 - 6 = 3$
<p>Question 2 Liam has 7 chips. After eating 3, how many chips does Liam have left?</p>	<p>Solution To calculate how many chips Liam has left, subtract the number of chips he ate from the number of chips he originally had.</p> $7 - 3 = 4$
<p>Question 3 8 cakes were served at a party. If 6 cakes were eaten, how many cakes are left?</p>	<p>Solution To calculate how many cakes are left, subtract the number of cakes eaten from the number of cakes that were served at the party.</p> $8 - 6 = 2$
<p>Question 4 There are 8 balls in a bag. If 1 ball is taken out, how many balls left in the bag?</p>	<p>Solution To calculate the number of balls left in the bag, subtract the number of balls taken out of the bag from the number of balls that were in the bag originally.</p> $8 - 1 = 7$
<p>Question 5 6 people started a race. 1 person didn't finish. How many people finished the race?</p>	<p>Solution To calculate the number of people who finished the race, subtract the number of people who didn't finish from the number of people who started the race.</p> $6 - 1 = 5$
<p>Question 6 There are 6 birds in a tree. If they all fly away, how many birds are left in the tree?</p>	<p>Solution To calculate the number of birds left in a tree, subtract the number of birds that flew away from the number of birds that were in the tree originally.</p> $6 - 6 = 0$
<p>Question 7 Sarah has 9 strawberries. After eating 2, how many strawberries does she have left?</p>	<p>Solution To calculate the number of strawberries left, subtract the number Sarah ate from the number of strawberries she had originally.</p> $9 - 2 = 7$
<p>Question 8 There are 9 buses at the depot. 3 buses drive away. How many buses were left at the depot?</p>	<p>Solution To calculate the number of buses left at the depot, subtract the number of buses that drove away from the number of buses that were at the depot originally.</p> $9 - 3 = 6$
<p>Question 9 Jack has 9 coins. After spending 5 coins, how many coins does Jack have left?</p>	<p>Solution To calculate the number the number of coins Jack has left, subtract the number of coins Jack spent from the number of coins he had originally.</p> $9 - 5 = 4$
<p>Question 10 There are 8 items on a shelf. 3 are taken away. How many items left on the shelf?</p>	<p>Solution To calculate the number of items left on the shelf, subtract the number of items taken away from the number of items originally on the shelf.</p> $8 - 3 = 5$
