Ice cream facts

Ice cream is a frozen dessert usually made from milk and cream. Vanilla and chocolate are the most popular ice cream flavours.

The most popular topping is chocolate.

The largest ice cream cake in the world weighed 5500 kg.

Most people take about 50 licks to finish a single scoop of ice cream.

Children between the ages of 2 and 12 eat the most ice cream.

In ancient Rome they used to mix fruit and juice with ice and snow.

Do you know any more interesting facts about ice cream?

Ice cream survey

Ask your family and friends what is their favourite ice cream flavour.

Record the information in a table like this.

chocolate	
strawberry	
vanilla
