

Jones' Cafe

Seven people order drinks at Jones' cafe. Bill pays for everyone. How much change will he get from \$50?

Two people order milk: \$2.40 each

Two people order coffee: \$3.50 each

One person orders tea: \$2.20

One person orders orange juice: \$3.00

Four other people went to the same cafe. They all had cakes costing \$3.80 each.

Each person also had a drink (either milk, coffee, tea or orange juice). Their total bill was \$25.60.

What did they order to drink?
