

How to play COCONUT BOWLING

Materials:

6 water bottles with lids
blue food colour
1 coconut
An outdoor pathway
Some tape or coloured chalk

How to make:

Fill six plastic bottles with water for the "bowling pins".

Add a few drops of blue food coloring to each bottle to create the illusion of ocean water.

Set up the blue water bottles in a triangular shape at one end of the pathway.

Next draw a line with chalk or place a line of tape at the other end of the path at the distance you want your coconut bowling alley to be. This is where you will bowl from.

Now you are ready to play! Try to knock all the pins (water bottles) down in one roll.

Each player gets 2 goes to roll the coconut at the pins before it is the next persons turn.

Hint: You could create different designs with the bottles, or create a kind of coconut obstacle course.
