| Scientific Method                        | Name:         |                         | Date:            |              |
|--|---------------|-------------------------|------------------|--------------|
| Question:<br>Does daily temperature affe | ct the rate o | of evaporation of water | ?                |              |
| Hypothesis:                              |               |                         | Sa S             | <u> </u>     |
| Experiment: (Construct an experiment th  | nat can be r  | epeated over time. Plan | methods for reco | ording data) |
|  |               |                         |                  |              |
|  |               |                         |                  |              |
|  |               |                         |                  |              |
|  |               |                         |                  |              |
|  |               |                         |                  |              |
| Analysis:                                |               |                         |                  |              |
| Conclusion:                              |               |                         |                  |              |
