

The Number Plane

Each point on the number plane is represented by two numbers. The first number shows the position on the x axis, the second number the position on the y axis.

Plot each point then join the points with straight lines in the order they appear.

$(-3, 3) \rightarrow (3, 3) \rightarrow (3, -3) \rightarrow (-3, -3) \rightarrow (-3, 3)$

$(-5, 2) \rightarrow (4, 2) \rightarrow (5, -3) \rightarrow (-4, -3) \rightarrow (-5, 2)$

$(0, 4) \rightarrow (4, -3) \rightarrow (-4, -3) \rightarrow (0, 4)$

$(-3, 4) \rightarrow (3, 4) \rightarrow (4, -1) \rightarrow (0, -4) \rightarrow (-4, -1) \rightarrow (-3, 4)$
